 - Workstation change
 - Automatic start/interruption/end with coming/leaving
 - Additional order information
 - Idle times (unproductive)

Kaba b-comm ERP SFDC – Module overview

Multi-order/multi-machine processing option

- **Time calculation, time splitting** for multi-order processing and multi-machine processing mode
 - **Parallel activities** (PP/PM/PS orders) of a person or a machine are split according to **prescribed times** or linearly
 - Optional **break deduction** using SAP shift plans
 - Individual configuration of **calculation rules** for each workstation, workstation group and performance type
- Separate reporting of **quantity wage slips** and **time wage slips** possible
